MEDICOMP AWARDED CONTRACT FOR AMBULATORY HOLTER MONITORING SYSTEMS THROUGH PREMIER PURCHASING PARTNERS, L.P.

Melbourne, FL, August 1, 2006: Medicomp Inc., a wholly owned subsidiary of United Therapeutics Corporation, announced today that it has been awarded a contract to sell Ambulatory Holter monitoring systems through Premier Purchasing Partners, L.P.

“Medicomp’s mission has long been to help physicians add quality years to patients’ lives. We are optimistic that this new contract will help even more patients throughout the United States by introducing them to the most advanced Ambulatory Holter monitoring technology available,” said Dan Balda, MD, Medicomp’s President.

Medicomp’s revolutionary Decipher Holter Monitor is designed with an on-board artificial intelligence algorithm, Diogenes™, making it capable of detecting a variety of different arrhythmias while on the patient. The Diogenes algorithm has been refined over the last 25 years. As a testament to its quality, Decipher was the only Holter Monitor to pass all the rigorous tests required to monitor the crew of the International Space Station as they live and work in outer space.

About Premier, Inc.

A healthcare alliance entirely owned by more than 200 of the nation’s leading not-for-profit hospitals and healthcare systems, Premier Inc. helps hospitals accelerate both clinical and financial performance.
