

Arrhythmia Access

with Web Enroll

With Medicomp you can easily access and manage your cardiac reports 24/7/365 from our secure HIPAA-compliant website - at no additional charge. The Arrhythmia Access website features a common user interface and easy to read icons for retrieving Event, Holter, and Pacemaker monitoring reports.

- “ One website for all cardiac reports
- “ Easily enroll patients on-line
- “ Clean, uncluttered user interface
- “ Easily organize reports from multiple locations and physicians
- “ Batch saving
- “ Batch printing
- “ Easy to read icons
- “ Versatile e-mail options

One Website

Save time by navigating Holter, Event, and Pacemaker reports from one website with the same username and password.

Web Enroll

Easily enroll Event, Holter, and Pacemaker patients on-line to streamline workflow, reduce paperwork, and save time.

Versatile E-mail Options

You have the option to periodically check the website for new reports, or receive an e-mail when a new report is posted based on your customized criteria.

Easy Organization

Even if you have multiple locations and multiple doctors, managing all patient reports is easy with one website and one login.

Batch Saving

Easily save multiple reports at the same time. Medicomp reports are presented in PDF format, allowing for convenient transfer to existing EMR software.

Batch Printing

Print one report, all reports, or anything in-between with ease. Reports can be sorted and printed based on prescribing physician or patient name.

Clean, Uncluttered Interface

Clean, contemporary design is user friendly and easy to use.

Easy-to-Read Indicators

From one page, you can easily see if a report has been viewed, printed, or if it meets notification criteria.

- Notification criteria met
- New report ready to view
- All reports have been viewed
- Some reports have been viewed
- All reports printed
- Some reports printed
