Medicomp's Pacemaker Follow-up Solution

... because convenience and dependability are essential

- Medicomp achieves maximum customer satisfaction by scheduling pacemaker follow-ups at the patient's convenience – anytime, 24 hours a day, seven days a week.
- Medicomp employs only clinically-certified staff that are specially trained to interact with cardiac patients.
- Medicomp is available 24/7 for “pacemaker on demand,” anytime the patient experiences a problem or feels something irregular.
- Medicomp provides STAT notification to the patient's physician according to the physician's pre-approved criteria.
- Medicomp supplies all the needed pacemaker follow-up equipment free of charge.
- Medicomp uses state-of-the-art Pacemaker TTM units, and is constantly testing and refining new technologies.
- Medicomp also offers quality Event and Holter services, with combined billing options available.

Why healthcare providers prefer Medicomp's complete solution

Industry Standard

Three different companies for pacemaker follow-up, Event and Holter monitoring services – with three different bills

Rigid scheduling constraints making it inconvenient for the patient

Billing complications with insurance companies and patients

Technicians with less than adequate training

Ineffective customer support

Antiquated equipment

Medicomp Solution
